October 12, 2007

Dear Tony,

I am sending along this letter to let you and your organization know how happy we are with our new air machines here in Ashland. The two machines have done wonders for the air quality in the building that we work in every day.

As you know we have a very serious ventilation issue here at the Ashland Town Hall and Police Department. To the point that the staff was complaining about having head aches every day that they worked. From the moment that we had the air machines installed the working environment has improved immensely. To this date not one complaint has been made regarding poor air quality.

So, we thank you for making Ashland Town Hall and Police Department a better place to work in.

Kindest regards,

Richard J. Alpers

Town Administrator
